

Weatherproof Telephone

H101-FK-L

DESCRIPTION:

Heinrich's H101-FK-L telephone, equipped with integrated LED flashlight, set the industry standard for reliable communication in harsh environments. Enclosed within a robust, corrosion-resistant cast aluminum weatherproof case, these telephones feature a secure door design that offers complete protection against dust and moisture ingress, ensuring exceptional reliability with an impressive Mean Time Between Failures (MTBF).

Engineered for durability, the handset is designed from molded Bulk Molding Compound, making it resilient against the toughest conditions. This makes the H101-FK-L ideal for use in diverse environments where robust performance is essential. Additionally, the armored cord provides enhanced resistance against vandalism and heavy industrial usage, ensuring the phone's longevity.

FEATURES:

- **Standard Analogue Phone:** Reliable and easy to use for basic telephony needs.
- **Vandal-resistant handset and Stainless Steel Cord:** Durable construction designed to withstand harsh conditions and prevent damage.
- **Aluminum Alloy Die-Cast Body:** Provides robust waterproof and dustproof protection.
- **Waterproof Full Keypad with Memory:** Features 09 programmable speed dial buttons for quick and easy access.
- **Integrated LED Flashlight:** Includes a continuous LED flashlight for enhanced visibility in low-light environments.
- **Loud Ringtone:** Ensures incoming calls are heard clearly, even in noisy settings.
- **Auto-Answer Feature:** Automatically answers and releases the line when the other side disconnects, ensuring seamless communication.
- **Wall Mounting:** Easy and convenient installation for various locations.
- **External Power Supply:** Provides consistent power for reliable operation.
- **Weatherproof Protection (IP66):** Engineered to perform reliably in challenging environmental conditions.
- **Comprehensive Compliance:** Meets CE, FCC, RoHS, IP66, and ISO9001 standards for quality and safety.

Weatherproof Telephone

SPECIFICATION:

Model	H101-FK-L
Dialling	MF (tone)
Power supply	Telephone drawn from telephone line; LED flash light and loudspeaker from external power supply
Lightning / Transient	Protection to ITU-T K.21 enhanced levels
TECHNICAL SPECIFICATIONS	
Casing Material	Aluminium die-casting with epoxy powder coating
Colors	Yellow and other colors available upon demand
Handset Material	ABS plastic with stainless steel spiral cord
Keypad	Full-featured weather resistant keypad
Temperature	Operating: -35°C t o +72°C , Storing: -40°C t o +90°C
Weather Resistance	IP66
Ringing Tone	105dBA
Hook switch	Electronic / magnetic with no visible moving parts
M.T.B.F.	55,000 hours
Weight	Up to 12 kg depending on option
Flash Light	LED flash light

DIMENSIONS:
